

The Business White Paper, a snapshot of the Japanese economy and a key advocacy document published by the ACCJ, is now available for purchase!*

The aim of the **White Paper**, consistent with the ACCJ's mission and its role as a supporter of reform, or "*Kaikaku Oendan*," is to provide an overview of the business environment in Japan and identify **measures** that the ACCJ believes are key for the United States and Japan in partnering for success in a globalizing economy.

Along with the ACCJ's slogan, "*Sōri Kyōsei*," or "Working Together, Winning Together," the White Paper captures the spirit behind the Chamber's constructive engagement in its policy dialogue with the Government of Japan. The White Paper offers the Chamber's **best proposals based on its members' global experience**, including their experience of running successful business operations in Japan for many years.

The White Paper offers the Chamber's recommendations on promoting further U.S.-Japan economic integration and reinvigorating the bilateral economic dialogue between the two countries.
